Work Experience

Great Scott Design *07/2018 – 06/2019*

- Front End Development
 - Convert designs from designer to functional websites
 - Convert older websites to adhere to modern website practices
 - Extend WodrPress functionality based on client needs
 - Add social networking features into existing websites.
- Search Engine Optimization
 - Research website keywords to improve website traffic
 - Manage analytics for clients to improve organic and search engine traffic
 - Improve conversion and SEO based on information found in analytics
- Server Management
 - Manage website and email hosting for over 30 clients

The Hauser Design Group, *03/2013 – 07/2018*

- Develop Single Page Apps (Vue and Angular JS) based on mockup from designer
- Integrate APIs with third-party services (Shopify, Aabaco, Nextopia, Twitter, ERP Systems and others)
- Develop and maintain custom web apps built with PHP, Node and Rust
- Ensure code quality with unit testing and test driven development
- Mobile apps built with Xamarin

Pilkington North America, *12/2010 – 03/2015*

- Maintain glass quality per customer's specifications
- Improve operation performance and efficiency with process reviews

Volunteer Experience

WRWO FM *2017-2019*

Website management, show uploads, social media presence, audio engineering

Lasallemocrats.com, *2016*

Wordpress development/server administration

Illinois Valley Vixens, *2013 – present*

Roller Derby Referee

Skills

- Angular 2 (2 years), Vue.js (2 years) – Single page apps that acted as a dashboard for extended functionality of ecommerce platforms. Mobile apps for people to post images to a custom social networking site. Web apps to aide in maintaining inventory on desktop and mobile devices.
- PHP (6 years), Node.js (6 years), C# (2 years), Rust (3 years) – Backend development for platforms that extended ecommerce functionality. Services built for customer management, inventory management, order management, shipping prices, and purchase order printing
- Front End Javascript (6 years) – Adding functionality to existing websites. Creating reusable jQuery plugins for components to be used across multiple websites.
- Xamarin (2 years) – Mobile apps built for festivals that allowed festival goers to show their purchased ticket and rank food, similar to Untapped
